

## Make a Feeding Pyramid

Cut around the shape above on the solid **BOLD** lines. Also cut out each impala and the cheetah.

Fold along the dotted line between the square and the triangles.

Put glue on the tabs and fold them inside the pyramid to hold it together.

Draw some grass and trees around the bottom of the pyramid.

Colour in the impala and the cheetah.

Stick an impala above the grass on each side of the pyramid

Put glue on the cheetah's tab and slot it inside the top of the pyramid. Hey presto! A feeding pyramid ☺
